2. Records Management Program

Mr. Bannerman said that a briefing on the Agency records problem had been presented at a meeting of the Deputies. There has been a sharp increase in the number of records being created, and a hard look will be taken at records now in storage to try and reduce their volume. This review will concentrate especially on the 40% of records holdings which are considered to be dead records without disposal schedules. In addition, a Records Management Board will be created, to be chaired by [redacted] with representatives from each directorate. This Board will develop a positive records program, including attention to the creation and origin of records. The Board will report within 30 days on how it proposes to attack the problem of the records now in storage.

3. Proposed Regulations, Notices, etc.

Mr. Coffey commented that in line with Mr. Bannerman's remarks above we should be particularly careful not to create records if we don't need them. He said that many proposals for the publication of regulations, notices, bulletins, etc. are being questioned as to their length, content, and need. If it is necessary to publish a regulation, it should be clear, concise and written for the benefit of the reader -- not for the benefit of the writer. Mr. Bannerman commented that he wants Office Heads to question such proposals when they are presented to them.

4. Space Survey

Mr. Bannerman noted that this survey is now under way. The report to be produced will serve as a basis for an overall
